

Solid State Drives

Computer manufacturers are continuously researching and experimenting to improve the performance of their hardware. This either comes in the form up software updates to improve current hardware or introducing improved versions of that hardware. At Performance by Design we make sure to keep up with these improvements.

Computer manufacturers have begun producing computers with improved hard drives called Solid State Drives. These are up to 5 times faster than the SATA hard drives installed in computers. These result in faster boot up times and data transfer rates. Solid State Drives (SSD) are also more durable than the SATA hard drive. More computers over time will be produced with Solid State Drives which will improve performance for your veteran's computer.

At Performance by Design, we can order a computer for you veteran with a SATA or SSD drive. We can also order computers with hardware speciation's tailored for your veterans needs. If you are interested in our products/services for your veteran, please call (866) 757-1221.

Lastly, we have now partnered with MLCC Computer Training and accept 28-1905s, POs, and Purchase Cards.

See our website www.performbydesign.com for details.
